

Bertrand Masselot
President and Chief Executive Officer
Air Liquide Canada

Bertrand Masselot holds a degree in engineering from Agroparistech, a Master in science from École Nationale du génie rural, des eaux et forêts (ENGREF) and a MBA from Le Collège des ingénieurs in Paris (France). From 1994 to 1997, he worked as Business Engineer, then Business Manager for two major companies in UK and Germany.

He began his career at Air Liquide in 1997 as Project Manager in Paris and, from 2000 to 2008, held various key roles within the Group and its subsidiaries throughout France and Germany. From 2008 to 2012, as Vice-President of Air Liquide Engineering, in Paris, he was responsible for the development and management of large turnkey projects for the Air Liquide Group and Third Party Sales, overseeing an annual budget of 150 M euros.

In 2012, Bertrand was appointed Chief Executive Officer of Air Liquide's Schülke & Mayr GmbH, a company of the Air Liquide Group, active in more than 100 countries in the healthcare sector. During his five years at the helm of the company, the business grew steadily in the prevention of contamination, both for individuals (antiseptic, disinfectants, etc.) and for the industry (additives, biocides).

On September 1, 2017, Bertrand Masselot was appointed President and Chief Executive Officer of Air Liquide in Canada, where he presently leads one of the 10 largest entities within the Air Liquide Group, with 2,600 employees and more than 200,000 clients and patients. The Canadian Head office is located in Montreal, Quebec.

Bertrand is married and has four children.
